## Profile

**Passionate Frontend Developer | Crafting Seamless User Experiences**
As a detail-oriented Frontend Developer, I specialize in transforming designs into high-performance, responsive web applications. With expertise in HTML, CSS, JavaScript, and modern frameworks like React and Tailwindcss, I bring an eye for design and a commitment to building scalable, user-friendly interfaces. Driven by innovation, I stay ahead of industry trends to create intuitive, visually engaging experiences that keep users coming back.

## Education

**Software Engineering,** *Bahir Dar University*                                             Bahir Dar, Ethiopia

## Professional Experience

**Frontend Developer,** *codealpha*                                         03/2025 – present
                                                                            Lucknow, India
- Gained hands-on experience in building dynamic, user-focused interfaces while applying best practices in performance optimization and code versioning with Git.

**Web Developer,** *Prodigy InfoTech*                                        02/2025 – present
                                                                            Mumbai, India
